The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of collocating dynamically loaded program files in object oriented programming environment. Specifically, claims 1, 23, 26 and 35 are directed to executing the main program, creating at least one library file which contains an application program file loaded during first execution and dynamically loaded program file during run time to make process relatively efficient. Therefore, the claimed invention improves the file loading process effective when it is done dynamically which reduced compilation process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
